Wapening in vloer voor derden

Wapening voor verankering of doorvoeren in de bekistingvloer voor constructies die aan de vloer hangen of erop afhangen dient door de verantwoordelijke van de deklafconstructie te worden bekend en uitgetekend.
De benodigde wapening dient conform te zijn met de positie in de vloer, diameter, aantal, haak op haak afstand, buigmoment, lengte, maatsluiting en details. Deze gegevens kunnen in overleg met Geelen Beton op de vloerconstructie worden verwerkt. Ter controle en voor schriftelijke goedkeuring aangeleverd aan de verantwoordelijke van deze constructie.
Verleend overnemen of vermits wapening licht voor versterking van derden.
Voor verdere toelichting zie ons document "Wapening in de vloer voor derden".

Sparingen dienen te worden ingetekend volgens onze richtlijnen en onze standaardafmetingen.
Afwijkingen worden alleen na overleg en schriftelijk akkoord verwerkt.

Verwerken van sparringen
Bij het verwerken van de aangeleverde sparringen kan het noodzakelijk zijn vanwege constructieve of productietechnische redenen dat sparringen moeten worden geschroefd, verkleind of zelfs moeten vervallen.
Geelen Beton behoudt zich het recht voor om afwijkingen in de constructie van de vloerconstructie zonder overleg te doen.
Bij afwijkingen van andere sparringen zal overleg moeten worden gezocht om tot een constructief en productietechnisch verantwoorde oplossing te komen.

Handtekening voor het inkomen van sparringen:
- Alle sparringen aangeleverd op 1 legplaatgrond.
- Alle maatvoeringen aangeleverd vanuit de rand van de plaat, indien sparringen digitaal aangeleverd worden dan is dit niet van toepassing.
- Standaard sparringen (afwijkende maten zijn niet mogelijk).
- Voor het doorvoeren van leidingen kunnen standaard gegalte blokken worden aangebracht in de maten.
